

Tile Canvases

Fired by Imagination

We have dedicated ourselves to forging relationships with artisans, clients and the professionals involved in projects. Our partnership with your organization would entail creating the best artwork to further your cause. We take tremendous satisfaction in the successful translation of a vision to a work of art.

We can work with your images to create a design sure to steal the show that will create interest and funding opportunities.

The nature of the work is originality. The fires of the kiln have the last say, and no two works are alike. Each project is unique in its challenges and outcome, some of which are never to be duplicated.

We maintain the same commitment to quality and satisfaction with our private and personal pieces that we have with our larger public artwork. The desire to create the best possible work, which fulfills the requirements and the dreams of our clients, is core to our motives.
